- Until the end of the FIFA World Cup Final Match, 404,299 devices got connected to the 12 host cities WiFi network.
- The highest number of devices simultaneously connected was 7.596 and happened 2 hours before the opening match.

- The record of devices simultaneously connected to the WiFi network of a single host city was 2,460 at 18:00h in July 13rd at Maracana during the Final Match between Germany x Argentina.
- Until the end of the FIFA World Cup, Media Services had a traffic of approximately 57 Terabytes of data at the network, this would be the same as 15,486,000 photos in high resolution, or 62,283,000 photos in regular resolution, or 12,192 DVDs.
- Until the end of the FIFA World Cup, approximately 74 Terabytes of traffic passed through Oi Network (Media + FITS), an amount of information similar to 19,938,000 photos in high resolution, or 80,187,000 photos in regular resolution, or 15.696 DVDs.

In terms of comparing, we can make the following considerations:

- During the FIFA Confederations Cup 2013, Media Services had traffic of approximately 7 terabytes of data at the network, an amount of information similar to 1 million and 975 thousand photos in high resolution, or 7.310 DVDs.
  - Until the end of the 2014 FIFA World Cup, the data traffic at the network, which supports the Media Services, was similar to 8.14 FIFA Confederations Cup
- During the whole 2010 FIFA World Cup South Africa, the media services had a traffic of approximately 25 Terabytes.
